

Shrink Wrappers-Tunnel

Shrink wrapper for trays with product fed at 90°.
Model ZEA-90.

OPERATION

The product is placed at 90° on the conveyor at the machine entrance. The presence of the package is detected at the end of the conveyor, Activate the decompression cylinder so that the pneumatic pushing system moves the product to the welding zone. It automatically shrink wraps individual units of different products and/or cardboard trays with pre-bundled products. This model does not bundle products.

TECHNICAL FEATURES

Monobloc construction to easily move the machine.

Shrink wraps with polyethylene film.

Electronic temperature control in the shrink wrap and welding tunnel.

Manual controls and fully automatic operation.

Top quality materials: OMRON automation system, FESTO pneumatic system, TELEMECANIQUE electrical devices.

PRODUCTS AND MARKET SECTORS
