

Shrink Wrappers-Tunnel

Full sealing shrink wrapper with side welds.
Model ZEF-SL.

OPERATION

Suitcases are placed on the machine's band entrance. The length of the welding bar allows enough width of film to be cut, so that the product can be fully wrapped and plastic remains fall on the sides. When the central weld is made, the product moves onto the output band, where the side welds are applied to fully seal the package. This prevents dust or any other element from coming into contact with the product.

TECHNICAL FEATURES

Monobloc construction to easily move the machine.

Shrink wraps with polyethylene film.

A shrink wrap tunnel will be installed according to the type of product.

Electronic temperature control in the shrink wrap and welding tunnel.

Manual controls and fully automatic operation.

Top quality materials: OMRON automation system, FESTO pneumatic system, TELEMECANIQUE electrical devices.

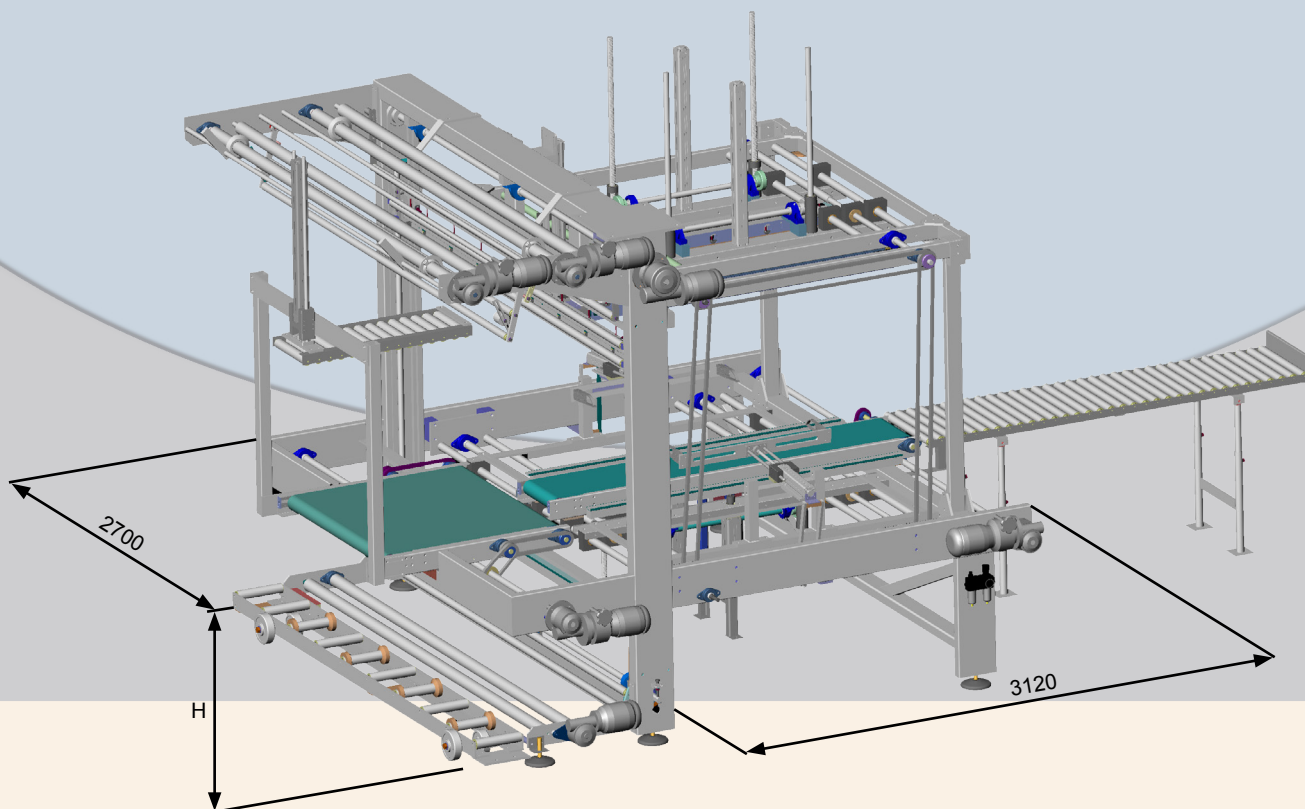

PRODUCTS AND MARKET SECTORS

Non-food products: clothing, towels and laundry utensils, furniture kits, pizza boxes, electrical appliances, compost, radiators, EPS polystyrene, cardboard boxes, etc.

Shrink Wrappers-Tunnel

Full sealing shrink wrapper with side welds.
Model ZEF-SL.

Voltage	220v or 380v
Power	40-48 Kw
Weight	1250 Kg
Air consumption	100 l/min
Air pressure	6 atm.
Film thickness	50-100 microns
Production	8-10p/min according to product
